

Designing Your AAA Sequence

Use this section to map AAA at both scales: the full experience and the next lesson.

Name of Experience / Module / Pipeline:
CS-110 // Expedition Report

Stage 1: Application

7. What real thing will the learner touch, test, make, or play with immediately?

They will be able to interact with a website that tells a story based on the communication relay

8. What productive friction do you want them to encounter here? What misconception should fail safely?

The story that follows the character, including what their role is and how it is relevant to the horror category of the communication relay

Stage 2: Action

9. What are the 3-5 core concepts, definitions, or moves that should arrive only after Stage 1?

The concepts would be the world, the story, the situation, the issue, and the plan.

10. How will the learner use those ideas to refine what they already began?

They will use it to build the story and to help add the narrative and the conclusion to the story.

Stage 3: Amplification

11. What bigger frameworks, professional practices, or collaborative contexts will open here?

Story telling may be opened for a wider audience to then be collaborated with, and expanded upon, or maybe reviewed.

12. How does AAA work at the macro scale of the full experience and at the micro scale of one lesson or node?

AAA can work with the efficiency of a team or an idea for example, when looking at things at a bigger scale and asking why and what it will be used for or how it will be beneficial or successful
